OMNI VIEW® FILTER PLATES

OMNI-VIEW® filter plates (formerly THERMO Reflecto-Gold) are gold coated shatter-proof polycarbonate lenses that are designed to exceed ANSI Z-87.1 standards for penetration and impact resistance.

Less than one-third the weight of glass, OMNI-VIEW® lenses offer more comfort to the welder. Additionally, they provide a true color field of vision that allows the welder to see every aspect of the weld zone.

OMNI-VIEW® lenses reflect 99.9% of the hot harmful infrared rays which results in less heat behind the lens and less eyestrain for improved weld quality and increased production.

A unique, exclusive built-in picture frame type gasket separates and protects the plate from the cover lens to provide longer life. Welders will appreciate the exclusive advantage and added eye comfort OMNI-VIEW® filter plates provide.

Available in 2 x 4 1/4, 4 1/2 x 5 1/4 & 50MM sizes.

OMNI-MAG® by GENTEX

Omni-Mag® welding magnifiers make a welder's work easier and a welder more comfortable.

Omni-Mag® welding magnifiers are made of breakage resistant, light weight polycarbonate with a scratch resistant coating. Available in 1.00, 1.50, 2.00, & 2.50 diopters.

FILTER PLATE LENS FOR EVERY JOB

STA-KLEER

The 100% Cast Resin Plastic

This THERMO product is one of America's most popular all plastic cover lenses. STA-KLEER is made from 100% cast resin to resist scratching and pitting and out performs other plastic cover lenses on hardness tests.

Each lens is passed through an ionized air stream during packaging which removes foreign particles and insures against dust adherence, premature scratching, and reduced vision.

STA-KLEER is available in 2 x 4 1/4, 4 1/2 x 5 1/4, 3 x 5 1/4 and 50 MM. In addition, custom sizes are available upon special request.

Manufactured to meet or exceed ANSI Z-87.1 & Federal Spec. GGG-H-211C.

TRIPLE DUTY COVER LENS

Glass, plastic coated on both sides to provide clear vision for a longer time. Will not peel or blister. Resistant to damage caused by weld slag. Available in 2 x 4 1/4 and 50 MM.

CLEAR COVER GLASS

Available in sizes 2 x 4 1/4, 4 1/2 x 5 1/4 and 50 MM.
